DETAILED ACTION***Information Disclosure Statement***

Information disclosure statements filed 5/19/2005 and 6/30/2006 have been considered.

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Optical waveguide couplers are well known and common in the art. Optical waveguide couplers having a groove for disposing thin film filters or reflectors are also well known in the art. One of the most relevant prior art of record, Yanagawa et al. (U.S. Pat. 4,958,897) teaches such optical waveguide coupler having a first and a second optical waveguide core, wherein the second optical waveguide core couples to the first optical core at the side face of the first waveguide core, similar to that claimed in the present application (see Fig. 14 of Yanagawa reproduced below).

However, Yanagawa et al. **do not teach a "gap"** formed between the first and second cores in adjacency to the intersecting region between the axial extensions of the first and second waveguide cores as required by the claimed invention of the present application. Further,

Art Unit: 2874

Yanagawa et al. do not teach the width of the first as well as the second optical waveguide core being narrower in the vicinity of the intersecting region between the axial extensions of the first and second cores.

Another relevant prior art, JP08-190026 (JP'026) reference does disclose a second waveguide core coupling to a first waveguide core at a side face of the first waveguide core, wherein there is a "gap" between the first and second waveguide cores in adjacency to the intersecting region between the axial extensions of the first and second waveguide cores (see Fig. 6 and Fig 10 reproduced below).

However, JP'206 does not disclose the width of the first and second optical waveguide cores that are narrower in the vicinity of the intersecting region between the axial extensions of the first and second waveguide cores, in the manner claimed in the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
